

DOCOMO PACIFIC, INC.

Line 610 – Ability to remain functional in emergency situations

DOCOMO PACIFIC is mindful of the importance of ensuring uninterrupted service so that law enforcement and public safety officials, as well as the public, can make important calls in the event of a hurricane or other emergency. DOCOMO PACIFIC hereby certifies, with respect to its voice and broadband services, that the company is capable of functioning in emergency situations as defined in the *ETC Report and Order*. To ensure continued provision of service, the company's Network Operations Center in Harmon is backed up from commercial power by one 1000 KW generator, and the Tamuning Switching Center is backed up from commercial power by one 300 KW generator. An automatic transfer switch is in place for both. Additionally, we have a 600 KW generator used as a secondary backup with manual transfer functionality for our Harmon Facility and a 250 KW as the secondary backup for the Tamuning Switching Center. DOCOMO PACIFIC also certifies that the company has in place an automated notification system and manual procedures for the management of traffic spikes and rerouting of traffic resulting from emergency situations.

FCC Form 481: Lines 1010 and 1030

Description of Voice and Broadband Service Rate Comparability

FCC Form 481 requires recipients of high-cost support to provide a description regarding how, during the previous calendar year, their pricing for fixed voice services was no more than two standard deviations above the applicable national average urban rate for voice service, as published annually by the Wireline Competition Bureau (“WCB”) and as required in 47 C.F.R. § 54.313(a)(2). Likewise, high-cost support recipients must provide a description regarding how their pricing for services meeting the FCC’s broadband public interest obligations was no higher than the applicable benchmark to be announced in a public notice issued by the WCB as required in 47 C.F.R. § 54.313(a)(3).

During calendar year 2023, DOCOMO PACIFIC, INC. (“the Company”) complied with the applicable voice and broadband rate comparability benchmarks, which were announced by the Wireline Competition Bureau in DA 22-1338 (WC Docket No. 10-90) published on December 16, 2022 (“Public Notice”). This document stated that carriers must provide basic residential voice service for no more than \$59.62 per month. The Company’s basic residential voice service is priced at \$24.99 per month, which is below the maximum rate of \$59.62.

Likewise, the Public Notice set forth the benchmarks for broadband service based on download and upload speeds, and capacity allowance. The Company’s broadband services that meet the FCC’s public interest obligations (as a recipient of RDOF auction support) complied with those benchmarks. The following is a comparison between the Company’s speed sets and corresponding prices, and those mandated by the FCC:

<u>Speed</u>	<u>Usage Allotment</u>	<u>Price</u>	<u>Benchmark</u>
100/20 Mbps	Unlimited	\$90.00/mo.	\$116.19

The above comparison demonstrates that, during calendar year 2023, the Company's fixed voice service offering, and the Company's broadband offering that met its RDOF public interest obligations, were priced at or below the FCC's applicable rate comparability benchmarks.
